Taking advantage of professional IT installations and wireless systems has never been easier. You can be confident in our expertise. We'll work together to learn about your IT infrastructure needs and determine the best and most cost-effective solution for your organization.

# Wireless and IT Infrastructures

## Our Services

We do complete IT infrastructure installations, data cable runs, and troubleshooting. Need Wi-Fi in your office or Internet extended to the back forty? We can do that too!

## Equipment Selection and your Confidence

Dependable installations of Wireless Systems demand the best equipment. Our company is Ubiquiti Broadband Wireless Admin-certified and we believe that Ubiquiti provides the best equipment for fixed Wireless, Wi-Fi networks, and/or any combination of the two. We use Ubiquiti AirMax for PtP and PtMP connections, UniFi devices for Wi-Fi applications, EdgeMax for general routing and switching, and AirFiber for long backhaul connections.

IP Industry standards coupled with professional grade components and materials ensure that every installation is dependable and future-proof for years to come. We are not satisfied unless you are!
